Office work

- Contractor's controlling operation this week: To DP: Elect Loops/ To CW: EBF1 Span 16-17 Pipes, Span 18-19 Deck Conc, Lost Deck.
- Attended the safety meeting. Greg Roth played a video on Hazardous Material Communication program. The presentation included the hazardous waste management, Code of Safe Practices, and Chapter 16 of the Safety Manual. MSDS is a safety net that all inspectors subject to hazardous material on the job must read before going to the site. There are two types of hazardous material/ chemical exposures. Physical and Health. Read the label before proceeding. The MSDS says what to do in case of an emergency. Ernie informed the group that CC Meyers on SS Detour hit falsework in lateral direction by an aerial manlift. No one got seriously hurt but shows how accidents can happen. Following the safety meeting discussed jobsite SWPPP requirements and activities. No major issues in regards to SWPPP were identified. A site inspection last week resulted in a Green rating. Following the SWPPP update, provided an update with the staff for activities involving the District and Structures items.
- Following the safety meeting conducted a staff meeting with my team. Talked about Estimates, NOPCs, EBMUD Claim, and the DRB's quarterly meeting on 8/26/09.
- Received an email from Dave McCracken, DRB Chairman, to confirm our next DRB meeting For August 26 at 10:00 AM at Caltrans office. The proposed agenda was attached.
- Received an email from Amer that Matt Able will be helping him in keeping track with our staff time (vacation, OT, Furlough, etc.). We will cooperate.
- Raj has CCO 121, 116, and 124 to review and respond se we can process.
- Reviewed and approved Survey request #108, Drainage System #4.
